

# **Environmental Management Policy**

LX Semicon, a company that designs, develops and manufactures semiconductor components, recognizes environmental management as a key element of corporate management and systematically builds, implements, maintains and continuously improves our environmental management system to meet international standard requirements.

For the purpose, the following environmental management policy is declared so that all employees can clearly understand required compliances through operation of the environmental management system.

## **[Environmental Management Policy]**

1. Operate organization fulfilling for environmental standards in compliance with environmental laws and other requirements.
2. Make environment-friendly company and prevent environmental pollution through energy-saving and resource-recycling.
3. Continue improvement activities for environmental performance.

All employees will do their best to participate in the environmental education and inspection through periodical interaction with others to achieve the target.

Leaders will take the lead in ensuring that all employees are committed to fulfilling social responsibilities and preserving environment through environmental management, and will ensure transparency in environmental management.
