Community Engagement Policy

LX Semicon is committed to fulfilling its corporate social responsibility and working with local communities to understand and address various issues that may arise. To this end, we will put ESG management into action to shape a better future through communication and collaboration with local communities, with the participation of residents.

[Process]
Following these procedures, we conduct various activities to engage and collaborate with local communities.

1. Data provision: Offer objective data that local communities can understand
2. Opinion collection/activities: Garner opinions and conduct improvement activities regarding local communities' issues
3. Cooperative system establishment: Lay the foundation for collaboration with local communities to resolve issues

Direction	Better Future with Our Community		
Principles	① Sincerity	② Sustainability	③ Voluntary participation
Goals	Lay the foundation for collaboration with local communities to promote their growth and address issues.	Support the vulnerable to join the efforts to improve welfare issues	Encourage local communities' voluntary engagement, disclose our actions, and facilitate communication

[Scope of Application]
This policy applies to our domestic business sites and recommends stakeholders, including employees and suppliers, to implement the same level of policy.
